

Dear Reader,

Now you have in your hands the number 2, 2016 of our Journal Ecological Engineering and Environment Protection. It contains selection of 9 papers that were presented as reports on the XI NATIONAL SCIENTIFIC CONFERENCE WITH INTERNATIONAL PARTICIPATION „**ECOLOGY AND HEALTH 2016**”, 9-10 June 2016 in House of Science and Technique, Plovdiv. In the Conference were presented 30 oral and 68 poster presentations, classified in the following topics: Agriculture, Food technologies, Medicine, Urbanization and environment.

The presented reports /oral and posters/ were focused on the broad variety of critical ecological problems in national and world scale.

All presentations were connected with the innovations, possessed the potential to contribute for the development of the idea of Bioeconomics and Circle economy. They were connected with the protection of the environment and urban areas.

Special accent were put on the innovative technologies in the direction of water and waste treatment, renewable energy, biogas production, composting as well as on the new approaches of monitoring, control and management of the natural resources. Very interesting reports have been presented on the bio agriculture. The participants shared new ideas, new solution problems, as well as the awareness that the science, technologies and innovation will contribute for protection of the health and future of our planet.

In this issue of the journal we propose 9 papers that passed the strong review. They are classified in the next journal topics: I. Man and biosphere; II. Technologies for treatment of pollution; II. Renewable energy and biofuels; IV. Ecomonitoring; V. Bioautomatics and bioinformatics

We hope that the papers will be interesting and useful for our readers.

After finishing of work of the section “Urbanization and environment”

Discussion about perspectives for application of technologies of biogas production

Editor of issue:

Prof. DSc Yana Topalova
